CAREER OBJECTIVES

To land a demanding job as a Front-End React Developer, I want to work as a web developer in a good environment where I can get the best mentorship to achieve maximum success in my career in web technology. I'll use my web development expertise and problem-solving abilities to help an organization succeed. I'm excited to combine my educational background and enthusiasm for front-end development as a newcomer to the industry to produce creative and eye-catching user experiences.

SKILLS

Languages: C++, Python, JavaScript.
Framework: React Js, Bootstrap, Tailwind CSS, Express Js.
Database: MongoDB.
Comfortable: TanStack, Firebase, Material UI, Daisy UI, JWT, Rest API.
Tools: Git, GitHub, Vercel, NPM, Netlify, Chrome DevTools, Figma, Canva.
Interpersonal: Team Work, Hard working, Attentive.

PROJECTS

Knowledgenet   Live Link | GitHub: Client-Side | Server-Side

An EdTech website can offer a wide range of functionalities to cater to the needs of learners, educators, and administrators.

- Allow users to create accounts, manage their profiles, track their progress, and view their course history.
- A searchable database of available courses, including descriptions, syllabi, and instructor information.
- Provide a platform for delivering course content, managing assignments, quizzes, and assessments, and facilitating communication between instructors and students.
- Ensure that the website is accessible to users with disabilities, including support for screen readers and alternative navigation methods.

Technology: React.js, Tailwind CSS, Firebase, Express.js, MongoDB.

Car Doctor   Live Link | GitHub: Client-Side | Server-Side

An automobile care service website typically offers various functionalities to cater to the needs of vehicle owners seeking maintenance, repairs, and other services.

- A detailed list of services offered, including routine maintenance (e.g., oil changes, tire rotations), repairs (e.g., brake service, engine diagnostics), and specialty services (e.g., detailing, windshield repair).
- An online booking system that allows users to schedule service appointments at their preferred date and time.
- Educational resources, tips, and articles related to car care, maintenance, and common issues faced by vehicle owners.

Technology: React.js, Tailwind CSS, Firebase, Express.js, MongoDB

EDUCATION
